INTERNAL RISK FACTORS

- 1. *Our inability to deliver as per our business plan could have an adverse impact on our results from operations. Further, there can be no assurance that we will be successful in selling our manufactured products.***

Our growth plans are considerable and would put significant demands on our management team and other resources. Our Company is proposing to expand its capacities by setting up a manufacturing unit. For further details, see the section titled “Our Business – Our Strategies” on page no. 76 of this Draft Prospectus. Further any delay in commercial production may adversely impact the cash flows and profitability of our company. Our cash flow requirements will be based on cash flows generated by our business. Further, the actual expenditure incurred on our ongoing projects may be higher than current estimates owing to but not limited to, implementation delays, cost over runs or adverse market developments, which may require us to source external capital resources.

Our manufactured products after commencement of commercial production will require a larger customer base. The same is on certain assumptions as to potential for growth in the sectors in which we operate, including identified customers with a demand for the manufactured products. In the event that our assumptions are not accurate or there is any material change in the various external factors on which our assumptions are made, there can be no assurance that we will be successful in selling our manufactured products leading to high inventory. This may also result in lower capacity utilization and adversely affect our operations and financial results.

The amount of funds required to make this unit commercially operational has been estimated by our management based on quotations and internal estimates. Our Management has started the trial production at our facility. However, the process of making this unit fully operational may be affected by various external factors including but not limited to:

- Our inability to acquire and install relevant machinery and equipments.
- Our inability to pay the necessary dues to key infrastructure providers such as power, water etc. on time in order and complete the necessary formalities or requirements to ensure that these facilities are set up for use. (For details please see “Our Business” on page 74 of this Draft Prospectus).
- Our inability to re-kindle the local labour or develop new labour relations or hiring.
- Our inability to obtain key government approvals on time or at all.
- Our inability to procure raw materials for manufacturing of our key business products.

2. *Stricter norms in India for companies doing business in plastic industry could affect our ability to effectively market our products, which may have an adverse effect on our business, results of operations and financial condition.*

There is an increased awareness towards controlling pollution and many economies including India have joined in the efforts to ban plastic product. In case any plastic products manufactured by us are banned in India, it could have a material and adverse effect on our business and results of operations. Applicable regulations relating to our industry have become increasingly stringent, a trend which may continue in the future. The penalties for non-compliance with these regulations can be severe, including the revocation or suspension of our business license, imposition of fines and criminal sanctions.

On March 23, 2018, Maharashtra Government banned the manufacture, usage, sale, transport, distribution, wholesale and retail sale and storage, import of plastic bags with or without handle, and disposable products made out of plastic and thermocol. Under the notification products manufactured from plastic and thermocol have been covered under the ban. As a result usage of plastic bags with a handle and without handle, disposable cups, and plates, spoons, forks, glasses, and containers is prohibited in the state. Plastic packaging used to wrap and store the product is also included in the ban. Citing the environmental risks and harm caused to wild animals from ingestion or entanglement in plastic, the government enforced the ban with immediate effect. As per the notification, violators will be fined Rs 5,000 and Rs 10,000 for the first and second-time offense. A third-time offender will have to shell out Rs 25,000 and may also face imprisonment for a period of three months. Plastic bags less than 50 microns thickness are not allowed to be used. Restriction on sale of plastic product has a direct and proportionate impact on us. The ban and the litigation shall have a negative impact on the plastic industry which could have an adverse effect on our business, results of operations, cash flows and financial condition.

3. *We are receiving benefits from certain government subsidies, which may not be available to us in the future. Loss of these benefits in the future may result in a decrease in our margins, which could in turn result in a material adverse effect on our business, financial condition and results of operations.*

We benefit from certain Government subsidies, including the Package Scheme of Incentives, 2013 and Credit Linked Capital Subsidy scheme (CLCSS), which provide certain incentives including but not limited to Industrial Promotional Subsidy to the extent of 70 % cost of Fixed Assets (The same is to be claimed in form of yearly VAT Refund within 10 years), Electricity Duty Exemption for 15 years etc.

Further our profitability may depend on these subsidies. Any changes in these governments’ subsidies might impact our business. There can be no assurance that these benefits will continue in the future. The non-availability of these benefits could adversely affect our business, financial condition, results of operations and prospects

4. *Our Individual promoters Mr. Harish Sirwani and Mrs. Nidhi Sirwani do not have any experience or background in manufacturing of plastic products.*

Our business was originally being run as a proprietorship named Roni Enterprises engaged in trading of plastic products. Further, our company is incorporated with a vision to corporatize our business. We intend to undergo a backward integration by further expanding our business by manufacturing plastic products for household use. We have taken a land on lease in MIDC Jalgaon for the proposed manufacturing unit. Our Individual promoters Mr. Harish Sirwani and Mrs. Nidhi Sirwani do not have any experience in manufacturing of plastic products. The implementation of manufacturing of household products may face initial teething problems or may not materialize at all. Owing to these conditions, we may not be able to estimate our future performance and our expansion may not yield the benefits actually intended.

- 5. *We operate in an unorganized industry and face significant competition. Our inability to compete effectively, market our products relative to our competitors may lead to lower market share, and adversely affect our operations and profitability.***

Our Company operates in highly competitive markets and faces competition; however it is not possible to compute the present market share of our Company since the Indian plastic industry is largely an unorganized industry and there are no reliable source / report which carry this data on market share. Further, the competition in these markets is based primarily on demand creation and as a result, to remain competitive in our markets, we must continuously strive to effectively market our products. In each of our markets, we face competition primarily from the unorganized market. In the event of price competition from our competitors, we may be required to reduce the price of our products while maintaining quality standards and our Company may not always be able to do so. Some of our competitors may have greater financial resources, generate higher revenues, and therefore, be able to better respond to market changes and shifts in consumer spending patterns and changes in consumer sentiments and tastes.

They also may be in a better position than us to sustain losses in revenue due to pricing pressures. Accordingly, we cannot be certain that we will be able to compete effectively with these competitors or that we will not lose customers to these competitors. If we are not able to compete effectively, our business, results of operations and financial condition could be adversely affected.

- 6. *We require to obtain, maintain and/or renew certain registrations, approvals, licenses and permission in ordinary course of our business, and if we fail to do so, in a timely manner or at all, we may be unable to fully or partially operate our businesses and our results of operations may be adversely affected.***

We require certain approvals, licenses, registrations and permissions for our operations. For further details, please refer to section titled “Government and Other Approvals” beginning on page 142 of this Draft Prospectus. While, we believe we will be able to obtain, maintain and renew such approvals or permits as required, there can be no assurance that we can do so in the timeframes anticipated by us, or at all. If we fail to obtain, maintain or renew any of these approvals or permits in a timely manner or at all, our operations and expansion plans may be interrupted, which could adversely affect our growth strategy, business and results of operations. Furthermore, our approvals and permits are subject to numerous conditions, some of which are onerous and require us to make substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business and results of operations could be adversely affected.

- 7. *Our products will be manufactured from our sole manufacturing facility located in the Jalgaon. Any disruption or suspension in the production process in this facility can significantly impact our ability to service customer needs.***

We will be manufacturing our products from our sole manufacturing facility in Jalgaon at Plot No F-55, Addl, MIDC Area, Ajanta Road, Jalgaon, Maharashtra - 425003 which will cater to our products’ demand. Any disruption in the operations due to supply of power outages, fire or industrial accidents at this unit could hamper or delay our ability to start or continue our manufacturing process. Any disruption or suspension in the manufacturing process in this facility can significantly impact our ability to service customer needs and relation with our customers and have a material adverse effect on our business, revenues, reputation, results of operation and financial condition

- 8. *Substantial portion of our revenues have been dependent upon few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.***

For the period ending August 31, 2018, our top 3 clients contributed our entire sales. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as changes in government policies and bankruptcy, change of management, mergers and acquisitions in other cases could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

9. *Since our business is based on trust and identity and using the same for maintaining, acquiring and servicing our clients, it is very important for us to ensure confidentiality of our intellectual property rights. Our Company has registered trademark for our products and labels. Failure or delay in renewing the same in the future may impact the Company's rights to use them.*

Our Company has a registered trademark **RONI®** for our products and labels. Failure or delay in renewing the same in the future may impact the Company's rights to use them. The Company has device mark type trademarks registered with Registrar of Trademarks under class 21. Any failure to renew registration of the aforesaid trademarks, may impact the Company's right to use them in future. Further, there can be no assurance that third parties may not infringe or copy our trademarks. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks, which may adversely affect our business, financial condition and results of operations. For further details, please refer to the chapter titled "Government and Other Approvals" on page no. 142 on this Draft Prospectus.

10. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

11. *We are dependent on third party transportation providers for the delivery of our products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects.*

We use third party transportation providers for the delivery of our products. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

12. *Our Company has availed ₹ 67.14 lakhs as unsecured loan which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.*

Our Company, as per the restated financial statement, has availed total sum of ₹ 67.14 lakhs as unsecured loan as on March 31, 2018, which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer the

chapter “Financial Indebtedness” on page no. 138 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

13. Our Company has reported certain negative cash flows from its operating and investing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its operating and investing activities in the year 2018 as per the restated financial statements and the same is summarized as under:

(₹ in lakhs)

Particulars	For the year ended	
	August 31, 2018	March 31, 2018
Cash flow from Operating Activities	(63.69)	(80.87)
Cash flow from Investing Activities	(250.47)	(59.22)
Cash flow from Financing Activities	317.03	143.71

For details, please refer “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our Company” on page no. 131 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

14. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the continued services of our promoters and our ability to attract, train and retain them.

Our Managing Director and promoter, Mr. Harish Sirwani, the founding member of our Company, is overseeing the Operations Department of our Company. Our Whole-time Director and promoter Mrs. Nidhi Sirwani, the founding members of our Company, provide professional guidance to our Company and heads Finance Department of our Company.

Further, if our Promoters divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

15. Our registered office and manufacturing facility is not owned by us, we have entered into lease agreement for the same. In case of suspension or cancellation of lease by MIDC, there may be an effect on our business, results of operations and prospects.

We do not own our registered office at Plot No F-55, Addl. MIDC Area, Ajanta Road, Jalgaon -425003, Maharashtra. We have entered into a lease agreement for the same with MIDC. Any defaults in complying with the terms and conditions/covenants on our part for the land acquired on lease from MIDC may be subjected to penal provisions and it may also lead to the cancellation of such lease.

Further, if we are required to relocate our registered office as a result of suspension or cancellation of lease, we may incur additional cost as a result of such relocation. If we are unable to renew the agreements pursuant to which we occupy the premises on terms and conditions acceptable to us, or at all, we may have to relocate to other places. Any failure or difficulty faced by us continuing the lease agreement may affect our business and its prospects. For further details of our Properties, please refer to section titled “Our Business” beginning on Page No. 74 of this Draft Prospectus.

- 16. *Our Company's manufacturing activities are dependent on availability of skilled and unskilled labourers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.***

Our Company has employed 7 employees on our payroll as on 31st August, 2018. These employees include employees in the Top and middle management and also those employees who are part of manufacturing unit and office staff. Our operations and performance are depends on our ability to identify, attract and retain both skilled and unskilled labour. Owing to our proposed commencement of manufacturing operations, our Company may have to appoint additional employees for the smooth functioning of the manufacturing unit. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected.

- 17. *We constantly face a credit risk which may in turn affect our complete cycle adversely. Also, any customer dispute regarding our performance may amount in delay or withholding of payment to us.***

Our business cycle is heavily dependent on timely payments being received from our customers. In case that our products are not delivered on timely basis and/or the quality of the products does not fulfill the requirements of our customer, it may lead to dissatisfaction. Further it may lead to consequence of customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in materially affecting our business.

In case of such default in payment/ unforeseeable delay in payment from any of our customers our working capital cycle will be adversely affected. This may lead to lack of competitive advantage against various other transporters leading to an adverse effect on our business operations and profitability.

- 18. *The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.***

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards working capital as described in "Objects of the Issue" on page no. 54 of this Draft Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of ₹ 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

- 19. *Our Company has no insurance coverage and we are not protected against all material hazards, which may adversely affect our business, results of operations and financial condition.***

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which will not be compensated by insurance as our company has no insurance coverage. If our Company suffers a large uninsured loss, our business, financial condition and results of operations may be

adversely affected. Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which will not be compensated by insurance. If our Company suffers a large uninsured loss, our business, financial condition and results of operations may be adversely affected.

20. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoter, Promoter Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Financial Statements – Related Party Transactions" on page no. 128 of this Draft Prospectus.

21. *Our success largely depends on our ability to attract and retain our Key Managerial Personnel. Any loss of our Key Managerial Personnel could adversely affect our business, operations and financial condition.*

Our Company is depending significantly on the expertise, experience, and continued efforts of our Key Managerial Personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "Our Management" beginning on page no. 90 of this Draft Prospectus.

22. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

23. *Our Group Company, R V Gems Private Limited has incurred loss in the last financial year.*

Our Group Company has incurred loss during the financial year proceeding the current financial year, details of which are as under:

(₹ in lakhs)

Name of Company	For the year ended March 31, 2018
R V Gems Private Limited	(0.49)

24. *Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.*

Our Promoter and Promoter Group may beneficially own approximately 65.40% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or

termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

25. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

26. *If our current or future employees were to unionize or our labour costs were to increase, our results of operations may be adversely affected.*

None of our employees is currently represented by a collective bargaining agreement and we believe that our non unionized operations have advantages over unionized competitors in providing reliable and cost-competitive customer services, including greater efficiency and flexibility.

However, we cannot assure you that our current or future employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. The unionization of our employees could result in an increase in wage expenses and our cost of employee benefits, limit our ability to provide certain services to our customers, cause customers to limit their use of our services due to the increased potential for strikes or other work stoppages and result in increased expenditures in connection with the collective bargaining process, any of which could have a material adverse effect on our business, financial condition and results of operations.

In addition, we enter into contracts with independent contractors to complete specified assignments and these contractors are required to source the labour necessary to complete such assignments. Although we generally do not engage these labourers directly, it is possible under Indian law that we may be held responsible for wage payments to labourers engaged by contractors should the contractors default on wage payments. Any requirement to fund such payments will adversely affect us, our business, financial condition and results of operations.

Further, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if we are unable to pass on the increased costs to our customers, our business operations and financial condition may be adversely affected.

27. *Our Company has issued Equity Shares in the last 12 months at a price which may be lower than the Issue Price.*

We have issued Equity Shares during the last 12 months preceding the date of this Draft Prospectus at a price that may be lower than the Issue Price.

Date of Allotment	No. of Equity Shares	Issue Price (₹)	Nature of Allotment	Allotted Person
April 20, 2018	1,43,946	10.00	Acquisition of Proprietorship Concern	Mr. Harish Sirwani
May 19, 2018	10,82,000	10.00	Right Issue	Mr. Harish Sirwani
				Mrs. Nidhi Sirwani

Date of Allotment	No. of Equity Shares	Issue Price (₹)	Nature of Allotment	Allotted Person
June 02, 2018	11,50,000	20.00	Right Issue	Mr. Harish Sirwani
				Mrs. Nidhi Sirwani

For further details in relation to the above issuance of Equity Shares, refer to the section titled “*Capital Structure*” on page no. 46. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

28. *Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

29. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.*

Although we have recently procured the machinery for our proposed manufacturing operations modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may not have the competitive edge. Although we strive to keep our technology, equipments and machinery in line with the latest technological standards, we may be required to implement new technology or upgrade the machineries and other equipment’s employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries may be significant which could substantially affect our finances and operations.

30. *We have not entered into any technical support service contract for the maintenance and smooth functioning of our equipment’s and machineries, which may affect our performance.*

Our manufacturing operations will involve daily use of technical equipments and machineries. They require periodic maintenance checks and technical support in an event of technical breakdown or malfunctioning. Our company has neither entered into any technical support service contract with any competent third party nor have we have entered into an annual maintenance contract for any equipments. In case of breakdown of machinery we may have to take support of local technicians for getting the machinery repaired and functioning. Our failure to reduce the downtime in case such events occur may adversely affect our productivity, business and results of operations.

31. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Fresh Issue as has been stated in the Chapter “*Objects of the Issue*” on page no. 54 of the Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

32. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our

business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

33. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

34. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of transport sector companies generally;
- Performance of our competitors in the our Industry and the perception in the market about investments in the our sector;
- Significant developments in the regulation of the industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

35. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on

Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

- 36. *We and the Selling Shareholders may decide not to proceed with this Issue at any time before Allotment. If we decide not to proceed with the Issue after the Issue Opening Date but before Allotment, the refund of Application amounts deposited will be subject to us complying with our obligations under applicable laws.***

The Company, in consultation with the Lead Manager, reserves the right not to proceed with this Issue at any time before the Allotment. If we withdraw the Issue after the Issue Opening Date, we will be required to refund all Application amounts deposited within 6 days of the Issue Closing Date. We shall be required to pay interest at the rate of 15% per annum on the Application amounts received if refund orders are not dispatched within 6 days from the Issue Closing Date. Notwithstanding the foregoing, the Issue is also subject to obtaining (i) the final listing and trading approvals of the Stock Exchange, which the Company shall apply for after Allotment and (ii) the final RoC approval.

- 37. *Any further issuance of Equity Shares by our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.***

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. Upon completion of the Issue, a minimum 20% of our post-Issue paid-up capital held by our Promoters will be locked up for a period of three years and entire pre-Issue Equity Share Capital will be locked up for a period of one year from the date of allotment of Equity Shares in the Issue. For further information relating to such Equity Shares that will be locked, please refer the chapter titled "*Capital Structure*" beginning on page no. 46 of the Draft Prospectus.

- 38. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

- 39. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition,

changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

40. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Draft Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

41. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page no. 81 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

42. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

43. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

44. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

45. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

46. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

47. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely

affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

48. *We will prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards (“Ind AS”). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.*

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 (“IAS Rules”), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2018, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan’s effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The upswing in global investment and trade continued in the second half of 2017. At 3.8 percent, global growth in 2017 was the fastest since 2011. With financial conditions still supportive, global growth is expected to tick up to a 3.9 percent rate in both 2018 and 2019. Advanced economies will grow faster than potential in 2018 and the next year; euro area economies are set to narrow excess capacity with support from accommodative monetary policy, and expansionary fiscal policy will drive the US economy above full employment. Aggregate growth in emerging market and developing economies is projected to firm further, with continued strong growth in emerging Asia and Europe and a modest upswing in commodity exporters after three years of weak performance.

Global growth is projected to soften beyond the next couple of years. Once their output gaps close, most advanced economies are poised to return to potential growth rates well below pre-crisis averages, held back by aging populations and lackluster productivity. US growth will slow below potential as the expansionary impact of recent fiscal policy changes goes into reverse. Growth is projected to remain subpar in several emerging market and developing economies, including in some commodity exporters that continue to face substantial fiscal consolidation needs.

Economic activity in 2017 ended on a high note growth in the second half of the year was above 4 percent, the strongest since the second half of 2010, supported by a recovery in investment. Outcomes exceeded the October 2017 World Economic Outlook forecasts in the euro area, Japan, the United States, and China, and continued to improve gradually in commodity exporters. Financial conditions remain supportive, despite the recent volatility in equity markets and increases in bond yields following signs of firming inflation in advanced economies. With broad-based momentum and expectations of a sizable fiscal expansion in the United States over this year and the next, global growth is now projected at 3.9 percent for 2018–19, a 0.2 percentage point upgrade for both years relative to the October 2017 forecast.

This positive momentum will eventually slow, however, leaving many countries with a challenging medium-term outlook. Some cyclical forces will wane: financial conditions are expected to tighten naturally with the closing of output gaps and monetary policy normalization; US tax reform will subtract momentum starting in 2020, and then more strongly as full investment expensing is phased out starting in 2023; and China's transition to lower growth is expected to resume as credit growth and fiscal stimulus diminish. At the same time, while the expected recovery in investment will help raise potential output, weak productivity trends and reduced labor force growth due to population aging constrain medium-term prospects in advanced economies. The outlook is mixed across emerging market and developing economies. Prospects remain favorable in emerging Asia and Europe, but are challenging in Latin America, the Middle East and sub-Saharan Africa, where despite some recovery the medium term outlook for commodity exporters remains generally subdued, with a need for further economic diversification and adjustment to lower commodity prices. More than one-quarter of emerging market and developing economies are projected to grow by less than advanced economies in per capita terms over the next five years, and hence fall further behind in terms of living standards.

Risks around the short-term outlook are broadly balanced, but risks beyond the next several quarters are clearly to the downside. On the upside, the growth spurt in advanced economies may turn out to be stronger and more durable than in the baseline, as slack in labor markets can be larger than currently assessed. Furthermore, the ongoing recovery in investment could foster a rebound in productivity, implying higher potential growth going forward. In the United States, financial conditions could tighten faster than expected, triggered, for example, by an adjustment in market

pricing of the future path of monetary policy, higher realized or expected wage and price inflation, and/or a sudden decompression of term premiums. Tighter financial conditions in the United States would have spillovers to other economies, including through a reduction in capital flows to emerging markets. Very expansionary fiscal policy in the United States, at a time when the current account deficit is already larger than justified by fundamentals, combined with persistent excess current account surpluses in other countries, is projected to widen global imbalances. Anxiety about technological change and globalization is on the rise and, when combined with wider trade imbalances, could foster a shift toward inward-looking policies, disrupting trade and investment. Recent import restrictions announced by the United States, announced retaliatory actions by China and potential retaliation by other countries raise concerns in this regard and threaten to damage global and domestic activity and sentiment. Similarly, changes in US tax policies are expected to exacerbate income polarization, which could affect the political climate for policy choices in the future. Climate change, geopolitical tensions, and cyber security breaches pose additional threats to the subdued medium-term global outlook.

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.. Indian economy is expected to grow at a rate of 6.7 per cent in the year 2017-18 and in the next financial year 2018-19 the economy is expected to grow at a rate of 7.2 per cent. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

(Source: <https://www.ibef.org/economy/indian-economy-overview>)

During September 2017, eight core infrastructure industries grew by 5.2 per cent, as compared to 4.9 per cent growth in August 2017 and 5.3 per cent growth in September 2016. The growth of core industries during April-September 2017 was 3.3 per cent, as compared to 5.4 per cent growth during the same period last year.

Overall growth in the Index of Industrial Production (IIP) was 3.8 per cent in September 2017, as compared with 4.3 per cent growth in August 2017 and 5.0 per cent growth in September 2016. During April-September 2017, IIP growth was 2.5 per cent as compared to growth of 5.9 per cent during the same period last year.

Foreign exchange reserves were US\$ 398.8 billion as on October 27, 2017, as against US\$ 370 billion in March 2017. (Source: *Indian Economic Development and Growth Monthly Economic Report- www.ibef.org*)

Economic growth is projected to remain strong and India will remain the fastest growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment. Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus.

OVERVIEW OF GLOBAL PLASTICS INDUSTRY

Global economic growth is generally interlinked to petrochemical consumption where plastic is an important partner. Plastic processing is the pillar of economy in most of the advanced economies.

Plastics Industry Multiples

Despite recent volatility, valuation multiples continue to be near all-time highs across each of the plastic end market sectors, as well as the overall market.

- Particularly within the U.S. market, there is somewhat of a supply/demand imbalance (i.e., more interest in plastics businesses relative to the number of quality companies available for sale) contributing to the high valuation levels that continue to be prevalent in the marketplace.
- Looking at publicly traded companies within the plastics industry, medical, packaging, machinery, and automotive multiples were up during 2017, although all segments are trading at very high levels.

- Major market indices are another indicator of high valuation levels, with the Dow Jones Industrial Average, S&P 500, and Nasdaq extending their highs from 2016 with increases of 24%, 18% and 27%, respectively, in 2017.
- In addition, new lower corporate tax rates, all things equal, could lead to higher cash flows for businesses, which could help sustain or increase valuation levels for plastics companies.

Life Cycle

In order to understand the life cycle of plastics products it is important to understand that not all plastics products are the same and not all have the same service life. Some plastic products have a shelf life of less than one year, some others of more than 15 years and some have a lifespan of 50 years or even more.

Future Trends in Production

(Source: <https://www.darrinqualman.com/global-plastics-production/>)

Road Ahead

Global plastics market is projected to grow at a CAGR of 7.03% from 2017 to 2025, as per Orian Research. Plastics are used in a variety of industries: construction, packaging, appliance, automobile, textile, transportation, and many others. A large number of manufacturers supply many different products to numerous end-users for a multitude of applications. The major drivers for plastics market would be its low cost, flexibility of use, easy manufacturing capabilities, growing construction in Asia-Pacific region among others. Thus, plastics can be regarded as synthetic or semi-synthetic organic

solids which can be transformed into several useful products. Also, the paradigm shift of technology to recycle plastics for end-use applications provide significant opportunities to the entire supply chain of the plastics market.

Further, our company is incorporated on 9th October 2017, as a private limited company under the name '*Roni Household Private Limited*' under the provisions of the Companies Act, 2013 with the Registrar of Companies, Mumbai with a vision to corporatize our business. A MOU dated April 5, 2018 has been entered into to give effect to the takeover of the business of Roni Enterprise (Proprietor Harish Sirwani). On March 01, 2018, our Company was converted into public limited company and the name of our company changed to '*Roni Household Limited*'.

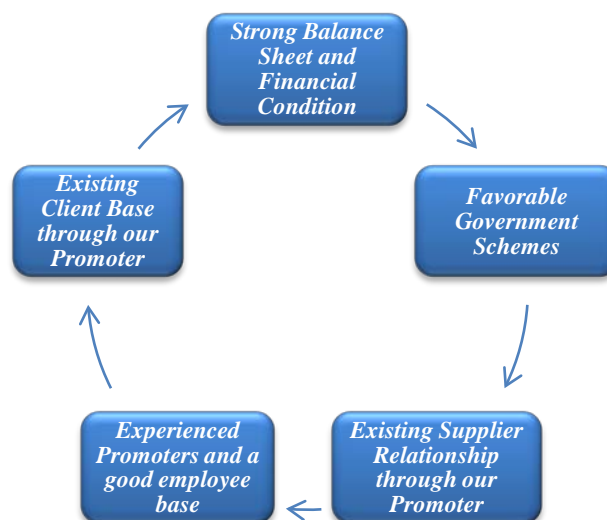

Our Company currently trades in plastic granules and plastic household products which includes tub, buckets, ghamela etc. We intend to further expand our business by manufacturing plastic products for household use. We have taken a land on lease in MIDC Jalgaon for the proposed manufacturing unit. For further details, please refer to the "*Property/Land details*" of this chapter on page no. 80 of this Draft Prospectus. A part of our proposed manufacturing unit has been set up on the leased land. Trial manufacturing process for small part of our proposed capacity has recently commenced.

Our Company plans to leverage its promoter networks in the Trading community of Jalgaon and strong balance sheet situation to increase its presence in the plastic products. Our Company is in the process of building a quality and innovation focused trading and manufacturing vertical as well as developing a strong team to cater to its proposed increased operational needs.

Since our company was recently incorporated we have not completed a full financial year, however we have reported a robust operating performance for 6 months period ended March 31, 2018 wherein our sales, EBIDTA and Profit after Tax were ₹ 429.70 lakhs, ₹ 10.58 lakhs and 7.80 lakhs respectively.

STRENGTHS

1. Strong Balance Sheet and Financial Condition

Though, we have been recently incorporated, we performed reasonably well with strong revenue and balance sheet position. As on August 31, 2018, the owned net worth of the company (i.e. equity plus free reserves) was Rs. 403.01 lakhs. Our Company is a low debt well capitalized company. Hence, we can procure the goods by making upfront payments and take benefit of cash discount or can buy in bulk and hold inventory for longer periods thereby improving our profitability. We believe that we have the ability to leverage our balance sheet to take advantage of a favorable business cycle or market opportunity.

2. Favorable Government Schemes

The land taken on lease for the proposed unit by our company is situated at MIDC, Jalgaon which is a industrially backward area (D Area). The government motivates growing industries in such areas through various incentive schemes. We are availing benefit under these schemes such as Package Scheme of Incentives 2013 and Credit Linked Capital Subsidy scheme (CLCSS). Benefits under these schemes include industrial promotion subsidy to the extent of 70% of cost of Fixed Assets, Power Tariff subsidy, Interest subsidy, Technology up-gradation subsidy etc.

3. Existing Supplier Relationship through our Promoter - Mr. Harish Sirwani.

Our existing supplier relationship protects the business with terms of supply and pricing of the products, the quality of the products offered etc. We being a small and medium size organization, rely on personal relationships with suppliers. Our company enjoys existing relationship with our suppliers. Further, we also leverage the past experience of our management in maintaining effective supplier relationship.

4. Experienced Promoters and a good employee base.

Our Promoter Director, Mr. Harish Sirwani has significant industry experience and has been instrumental in the consistent growth of our group. He is ably supported by our staff and other co-directors. For further details regarding the experience and qualifications of our management team please see “*Our Management*” beginning on page no. 90 of this Draft Prospectus. We believe that the knowledge and experience of our promoter and management will enables us to identify new opportunities, rapidly respond to market conditions, adapt to changes in the business landscape and competitive environment and enhances the growth in the business.

5. Existing Client Base through our Promoter

Since our promoter- Mr Harish Sirwani was already active in the trading business of plastic products whether directly or indirectly, we are successful in building a strong client base for our business. Our existing relationships help us to get repeat business from our customers. This has helped us to maintain a long term working relationship with our customers and improve our customer retention strategy. We have strong existing client relationships which generates multiple repeat orders. We believe that our existing relationship with our clients represents a competitive advantage in gaining new clients and increasing our business.

STRATEGIES

The key elements of our strategies are as follows:

1. *Organic Growth Strategy*

We intend to further expand business by manufacturing plastic products for household use such as tub, buckets, ghamela, basket, patla etc. Our Company has taken a land on lease in MIDC, Jalgaon, for setting up the manufacturing unit. Further, A part of our proposed manufacturing unit has been set up on the leased land. Trial manufacturing process for small part of our proposed capacity has recently commenced. For further details, please refer to the “*Property/Land details*” of this chapter on page no. 80 of this Draft Prospectus. Further, Our Company believes that expanding our scope to manufacturing our products will be aided by our existing customer base and long standing trade relations. We intend to tap various geographical markets which will be possible only once we have a broad product base.

2. *Improving Debt – Equity Ratio*

Our Company has obtained unsecured loans from Directors from time to time. These loans were utilized for working capital requirement and are repayable on demand. We intend to repay these loans to improve our debt equity ratio and also this will help our company to obtain vehicle loans, term loans for expansion which will improve our operational efficiency.

Further, repayment of unsecured loans will reduce burden of repayment of loans repayable on demand and enhance our Financial Stability and reduce long term liabilities.

3. *Competitive Pricing:*

Price is an important aspect of a business' marketing mix and changing the price can drastically affect the marketing tactics necessary for success. To remain aggressive and capitalize a good market share, we believe in offering competitive prices to our customers. This helps us to sustain the cut-throat competition and withhold a strong position in the market. Further it helps us to prevent loss in company's market share.

4. *Continue to develop client relationships and trust*

We plan to grow our business primarily by growing our customer relationships and trust. We believe that increased customer relationships and trust will add stability to our business. We seek to build on existing relationships and

also focus on bringing into our portfolio more clients. We believe that our business is a by-product of relationship and trust. Long-term relations are built on trust and continuous meeting with the requirements of the customers.

5. *To build-up a professional organization*

As an organization, we believe in transparency and commitment in our work and with our customers. We have an experienced team for taking care of our day to day operations. Justification for holding period levels

Particulars	Details
Current Assets	
Inventories	We procure our raw material required for manufacturing of products in bulk in advance based on estimated requirement and for trading, we procure on order to order basis and these bring down our inventory levels. Hence we have estimated the inventory levels at an average 63 days.
Trade Receivables	Being a trading and manufacturing company we normally provide goods on credit to our customers. Our sales collection tenures would differ from customer to customer. Hence we have estimated the trade receivable levels at an average of 65 days.
Current Liabilities	
Trade Payables	We have estimated the trade payable levels at an average of 10 days. By making early payments to the suppliers (i.e. availing lower credit periods), the company shall be able to get competitive prices for its products, thereby increasing the profitability of the Company. Thus the Company has estimated lower credit period which would in turn help in reducing the cost of goods sold and improve profitability margins.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The upswing in global investment and trade continued in the second half of 2017. At 3.8 percent, global growth in 2017 was the fastest since 2011. With financial conditions still supportive, global growth is expected to tick up to a 3.9 percent rate in both 2018 and 2019. Advanced economies will grow faster than potential in 2018 and the next year; euro area economies are set to narrow excess capacity with support from accommodative monetary policy, and expansionary fiscal policy will drive the US economy above full employment. Aggregate growth in emerging market and developing economies is projected to firm further, with continued strong growth in emerging Asia and Europe and a modest upswing in commodity exporters after three years of weak performance.

Global growth is projected to soften beyond the next couple of years. Once their output gaps close, most advanced economies are poised to return to potential growth rates well below pre-crisis averages, held back by aging populations and lackluster productivity. US growth will slow below potential as the expansionary impact of recent fiscal policy changes goes into reverse. Growth is projected to remain subpar in several emerging market and developing economies, including in some commodity exporters that continue to face substantial fiscal consolidation needs.

Economic activity in 2017 ended on a high note growth in the second half of the year was above 4 percent, the strongest since the second half of 2010, supported by a recovery in investment. Outcomes exceeded the October 2017 World Economic Outlook forecasts in the euro area, Japan, the United States, and China, and continued to improve gradually in commodity exporters. Financial conditions remain supportive, despite the recent volatility in equity markets and increases in bond yields following signs of firming inflation in advanced economies. With broad-based momentum and expectations of a sizable fiscal expansion in the United States over this year and the next, global growth is now projected at 3.9 percent for 2018–19, a 0.2 percentage point upgrade for both years relative to the October 2017 forecast.

This positive momentum will eventually slow, however, leaving many countries with a challenging medium-term outlook. Some cyclical forces will wane: financial conditions are expected to tighten naturally with the closing of output gaps and monetary policy normalization; US tax reform will subtract momentum starting in 2020, and then more strongly as full investment expensing is phased out starting in 2023; and China's transition to lower growth is expected to resume as credit growth and fiscal stimulus diminish. At the same time, while the expected recovery in investment will help raise potential output, weak productivity trends and reduced labor force growth due to population aging constrain medium-term prospects in advanced economies. The outlook is mixed across emerging market and developing economies. Prospects remain favorable in emerging Asia and Europe, but are challenging in Latin America, the Middle East and sub-Saharan Africa, where despite some recovery the medium term outlook for commodity exporters remains generally subdued, with a need for further economic diversification and adjustment to lower commodity prices. More than one-quarter of emerging market and developing economies are projected to grow by less than advanced economies in per capita terms over the next five years, and hence fall further behind in terms of living standards.

Risks around the short-term outlook are broadly balanced, but risks beyond the next several quarters are clearly to the downside. On the upside, the growth spurt in advanced economies may turn out to be stronger and more durable than in the baseline, as slack in labor markets can be larger than currently assessed. Furthermore, the ongoing recovery in investment could foster a rebound in productivity, implying higher potential growth going forward. In the United States, financial conditions could tighten faster than expected, triggered, for example, by

an adjustment in market pricing of the future path of monetary policy, higher realized or expected wage and price inflation, and/or a sudden decompression of term premiums. Tighter financial conditions in the United States would have spillovers to other economies, including through a reduction in capital flows to emerging markets. Very expansionary fiscal policy in the United States, at a time when the current account deficit is already larger than justified by fundamentals, combined with persistent excess current account surpluses in other countries, is projected to widen global imbalances. Anxiety about technological change and globalization is on the rise and, when combined with wider trade imbalances, could foster a shift toward inward-looking policies, disrupting trade and investment. Recent import restrictions announced by the United States, announced retaliatory actions by China and potential retaliation by other countries raise concerns in this regard and threaten to damage global and domestic activity and sentiment. Similarly, changes in US tax policies are expected to exacerbate income polarization, which could affect the political climate for policy choices in the future. Climate change, geopolitical tensions, and cyber security breaches pose additional threats to the subdued medium-term global outlook.

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.. Indian economy is expected to grow at a rate of 6.7 per cent in the year 2017-18 and in the next financial year 2018-19 the economy is expected to grow at a rate of 7.2 per cent. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

During September 2017, eight core infrastructure industries grew by 5.2 per cent, as compared to 4.9 per cent growth in August 2017 and 5.3 per cent growth in September 2016. The growth of core industries during April-September 2017 was 3.3 per cent, as compared to 5.4 per cent growth during the same period last year.

Overall growth in the Index of Industrial Production (IIP) was 3.8 per cent in September 2017, as compared with 4.3 per cent growth in August 2017 and 5.0 per cent growth in September 2016. During April-September 2017, IIP growth was 2.5 per cent as compared to growth of 5.9 per cent during the same period last year.

Foreign exchange reserves were US\$ 398.8 billion as on October 27, 2017, as against US\$ 370 billion in March 2017. (Source: [Indian Economic Development and Growth Monthly Economic Report- www.ibef.org](http://www.ibef.org))

Economic growth is projected to remain strong and India will remain the fastest growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment. Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus.

OVERVIEW OF GLOBAL PLASTICS INDUSTRY

Global economic growth is generally interlinked to petrochemical consumption where plastic is an important partner. Plastic processing is the pillar of economy in most of the advanced economies.

Plastics Industry Multiples

Despite recent volatility, valuation multiples continue to be near all-time highs across each of the plastic end market sectors, as well as the overall market:

- Particularly within the U.S. market, there is somewhat of a supply/demand imbalance (i.e., more interest in plastics businesses relative to the number of quality companies available for sale) contributing to the high valuation levels that continue to be prevalent in the marketplace.
 - Looking at publicly traded companies within the plastics industry, medical, packaging, machinery, and automotive multiples were up during 2017, although all segments are trading at very high levels.
 - Major market indices are another indicator of high valuation levels, with the Dow Jones Industrial Average, S&P 500, and Nasdaq extending their highs from 2016 with increases of 24%, 18% and 27%, respectively, in 2017.
 - In addition, new lower corporate tax rates, all things equal, could lead to higher cash flows for businesses, which could help sustain or increase valuation levels for plastics companies.

Road Ahead

Global plastics market is projected to grow at a CAGR of 7.03% from 2017 to 2025, as per Orian Research. Plastics are used in a variety of industries: construction, packaging, appliance, automobile, textile, transportation, and many others. A large number of manufacturers supply many different products to numerous end-users for a multitude of applications. The major drivers for plastics market would be its low cost, flexibility of use, easy manufacturing capabilities, growing construction in Asia-Pacific region among others. Thus, plastics can be regarded as synthetic or semi-synthetic organic solids which can be transformed into several useful products. Also, the paradigm shift of technology to recycle plastics for end-use applications provide significant opportunities to the entire supply chain of the plastics market.

OVERVIEW OF INDIAN PLASTICS INDUSTRY

Introduction

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the

country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90 percent of which are small and medium-sized enterprises.

- Export of plastic products from India increased by 17.1 per cent to US\$ 8.85 billion in 2017-2018 as compared to US\$ 7.56 billion in 2016-17.
- Exports of plastic raw materials stood at US\$ 3.24 billion in 2017-18
- During 2017-18, major importers of Indian plastic products were US (US\$ 1.11 billion), China (US\$ 728.31 million), UAE (US\$ 440.81 million), Italy (US\$ 403.94 million), Germany (US\$ 367.02 million), Turkey (US\$ 334.18 million), UK (US\$ 318.25 million), Bangladesh (US\$ 257.14 million) and Nepal (US\$ 205.82 million)
- The Indian plastics industry produces and exports a wide range of raw materials, plastic-moulded extruded goods, polyester films, moulded / soft luggage items, writing instruments, plastic woven sacks and bags, polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory / medical surgical ware, tarpaulins, laminates, fishnets, travelware, and others.
- The Indian plastics industry offers excellent potential in terms of capacity, infrastructure and skilled manpower. It is supported by a large number of polymer producers, and plastic process machinery and mould manufacturers in the country.
- Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on imports. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene and PVC, are manufactured domestically.

Structure of the Indian Plastic Industry

The entire chain in the Plastic industry can be classified into:

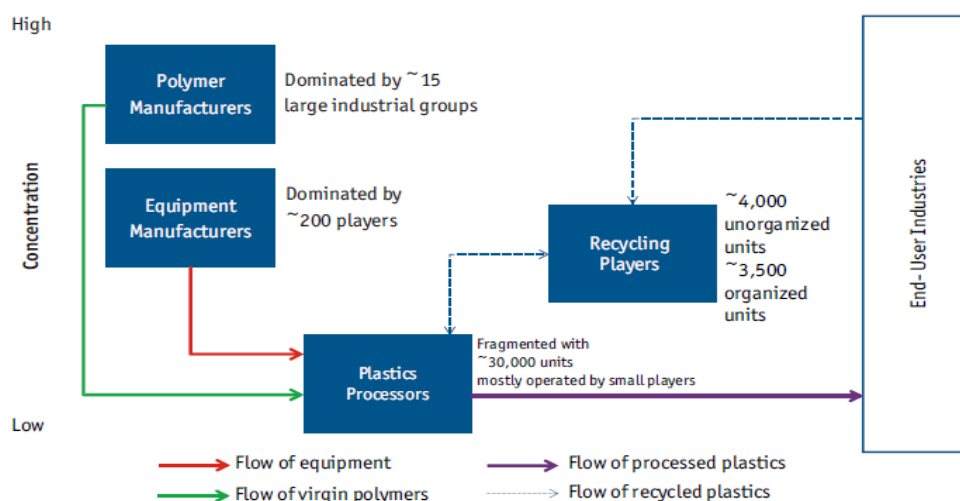

- Upstream sector: Manufacturing of polymers
- Downstream sector: Conversion of polymers into plastic articles

The upstream polymer manufacturers have commissioned globally competitive size plants with imported state-of-art technology from the world leaders. The upstream petrochemical industries have also witnessed consolidation to remain globally competitive.

The downstream plastic processing industry is highly fragmented and consists of micro, small and medium units. There are over 30,000 registered plastic processing units of which about 75% are in the small-scale sector.

The small-scale sector, however, accounts for only about 25% of polymer consumption. The industry also consumes recycled plastic, which constitutes about 30% of total consumption.

Structure of the Indian Plastic Industry

There is a good scope for innovative products which will further contribute to growth of the sector in years to come. The packaging industry has witnessed a complete replacement of old age products with the new ones. With India's population similar to China's, but polymer demand at only one-fifth of China's, the Indian subcontinent's plastics industry has a good potential for growth. Improving standards of living have led to an increase in consumption of a wide range of consumer goods from packaged foods to automobiles. Investments in infrastructure and agriculture are also further fueling the demand of plastics and related products in India. While the outlook for plastics processing in the Indian subcontinent is positive, the industry still faces many challenges in terms of inadequate infrastructure & environmental myths.

The Indian plastic industry is making significant contribution to the economic development and growth of various key sectors in the country which includes Automotive, Construction, Electronics, Healthcare, Textiles, and FMCG. The developments in the plastic machinery sector are coupled with developments in the petrochemical sector, both of which support the plastic processing sector. This has facilitated plastic processors to build capacities for the service of both the domestic market and the markets overseas. Today, the plastic processing sector comprises over 30,000 units involved in producing a variety of items, gaining notable importance in different spheres of activity with per capita consumption increasing. The plastic processing industry has the potential to contribute in bringing foreign investments and thus India's vision of becoming a manufacturing hub.

Recent Developments

India is ready to have 18 plastic parks and Government will be investing Rs 40 crore (US\$ 6.2 million) to increase the domestic production of plastics. This will achieve environmentally sustainable growth and increase employment.

PLASTICS EXPORT PROMOTION COUNCIL

The Plastics Export Promotion Council (PLEXCONCIL) is the apex government body responsible for the promotion of plastic exports. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organising buyer- seller meets both in India and overseas, and engaging in various other promotion and need-based activities.

(Source: <https://www.ibef.org/exports/plastic-industry-india.aspx>)

Consumption

The Indian plastic industry is among the fastest growing ones. According to a 2017 knowledge paper by FICCI, a business and industry lobby, Indian plastic processing industry saw compounded annual growth rate of 10% between 2010 and 2015. Annual plastic consumption is expected to increase from 12 million tonnes to 20 million tonnes by 2020.

(Source: <http://ficci.in/ficci-in-news-page.asp?nid=14553>)

Exports

The export promotion strategies evolved since 1955, the year when PLEXCONCIL was born, have fetched rich dividends, which is exhibited in the form of high export growth rates. From a meagre export turnover of 16.5 million US Dollars worth of exports in 1955-56, the exports from the Indian plastic industry has reached over 8.8 billion US Dollars in 2017-2018 and has targeted to reach 10.6 billion US Dollars by 2018-2019.

In its pursuit to achieve export excellence, various export promotional activities are undertaken by PLEXCONCIL. These include participation in international trade fairs; sponsoring delegations to target markets; inviting business delegations from the overseas to India; organizing buyer-seller meets both in India and the overseas etc. and servicing the needs of its members.

Products from the Indian plastic industry are exported to over 150 countries round the globe with the major trading partners being the European Union, USA, China, UAE, Saudi Arabia, Turkey, Nigeria, Indonesia, Egypt etc.

Key Growth Drivers

(Source: <http://ficci.in/spdocument/20872/report-Plastic-infrastructure-2017-ficci.pdf>)

Challenges

Indian Plastic industry continues to face challenges like disposal of waste plastics, dated technology and irrational customs duties. Disposal of waste plastics is a major problem in India, considering that of the 15,000 MT of plastic wastes that gets generated in India every day about 6,000 MT remains littered and uncollected. The Government and recycling industry both have an important role to play in tackling these challenges, as the plastics industry seeks sustainable solutions. Going ahead, recycling & reuse of plastics could be a foremost step towards fostering innovation and sustainability. While the industry needs to spend more on Research and Development and technological innovations to ensure recycling & reuse of wastes, the government should incentivize manufacturers focusing on waste reduction.

Plastic Products

The plastic industry in India has made significant achievements since its beginning by commencing production of polystyrene in 1957. In the last decade, with the advent of new and improved products, the industry has gained greater importance with the production of better and improved quality of plastic products. The plastic industry caters to the entire spectrum of daily use items and covers almost every sphere of life such as clothing, housing, construction, furniture, automobiles, household items, agriculture, horticulture, irrigation, packaging, medical appliances, electronics and electrical items.

(Source: <http://ficci.in/spdocument/20872/report-Plastic-infrastructure-2017-ficci.pdf>)

India's Plastics industry is one of the largest in the world at an estimated market size of INR1.8t. However, due to low capital intensity and low technological barriers, the industry has remained highly fragmented. Unorganized players enjoy ~44% market share, though the organized players have gained ground in the last five years on rising brand consciousness, better quality, and growth in the organized retail sector. The industry primarily comprises of four components: Packaging, Pipes, Industrial Products, and Consumer Products. Of these, Consumer Products, Pipes, and Packaging have significant presence of unorganized players.

The Indian Plastics industry is highly fragmented. Entry barriers are low, with low capital intensity, no technological barriers, and supportive government schemes. The industry comprises of ~30,000 processing units, 85-90% of which are small and medium enterprises, employing ~4m people. Our discussions with market participants suggest that this has led to the market share of unorganized players remaining high at ~44%. The share of organized players has increased from ~45% five years ago to ~56% in FY17, led by (a) increasing brand consciousness, (b) the organized segment's ability to offer better quality and greater convenience, (c) increasing disposable income leading to enhanced purchasing power, and (d) growth of organized retail.

There are four main components of the Plastics industry: Pipes, Consumer Products, Packaging, and Industrial Products. Packaging, Industrial Products, and Pipes (partially) are B2B businesses, whereas Consumer Products and Pipes (partially) are B2C businesses. The unorganized players have a presence in both B2B and B2C segments. The INR31b B2C Consumer Products business has 80% unorganized presence. The larger INR1.5t Packaging business has 45% unorganized presence, and the INR300b Pipes segment has 40% presence of the unorganized sector. The Industrial Products segment (~INR18b) is largely organized, with a mere 10% market share of unorganized players. Furniture, houseware, and pipes (partially) are sold in the B2C chain, whereas packaging, industrial products, and pipes (partially) are sold in the B2B chain. In a short B2C chain, consumers are indifferent between organized and unorganized players, as the focus is on pricing. This is primarily due to the fact that end consumers do not get input credit for taxes paid. Other things being equal, unorganized players have lower cost, as taxes are not levied. Plastic processors 'manage' their purchases in the unorganized chain to meet with the demand of the consumers.

Indeed, as domestic plastics demand and consumption in India continues to grow at about twice the rate of India's overall economy, polymer-making is a segment of the industry moving fastest, with an expected growth rate of 8-12 percent a year through 2020. Today, the industry is upbeat, and from the market point-of-view the optimism is justified. The approximate size of the industry, according to ibef.org, is more than 2,000 exporters, 150 plastic processing machinery manufacturers and more than 30,000 processing units. Yet 85-90 percent of the sector remains small-scale. The really good news: domestic plastics consumption is expected to touch 20 million metric tonnes by 2020. And Union Petroleum and Natural Gas Minister Dharmendra Pradhan has said that India's annual per capita consumption was projected to double to 20 kg by 2022. Data on the Indian plastics industry is often inconsistent - different industry bodies report different sets of figures, in different currencies and measures. There is much scope here to reduce this inconsistency. What is certain, though, is the variety. A good indication is India plastic directory. com, a website that has created a directory of companies, firms, businesses and factories involved in the plastics life-cycle in India, in some way or the other. Entities making additives and chemicals: 414. Those making automobile plastic parts: 158. Bottles: 125. Bags, film and lay flat tubing: 977. Heaters and coolers: 110. Brushes and brooms: 109. Gift novelty items: 174. Nylon products: 92. Given the large presence of plastics processors, a large segment of the industry is devoted to the making of moulds and dies: 1,355. Polyvinyl chloride (PVC) is easily India's predominant polymer. 714 entities manufacture PVC compounds. Merely compare the number that make PE or polyethylene (27), PP or polypropylene (31) and polyurethane (53). 58% injection moulding 30% extrusion 10% blow moulding 2% others Main plastic processing technologies in India 05 There are 259 plastics raw materials suppliers. And 267 plastics raw materials producers (e.g., raw material for engineering plastics products; colours, plastics granules, PP). Resins and allied products are the preferred niche of 145 entities. Ten entities are invested in polycarbonate

products. 133 make LLDPE, LDPE, HDPE products. 116 make injection-moulded containers. 55 entities produce disposable containers. Plastic pipes, hoses and pipe fittings: 631. Plastic buckets: 44. PET bottles: 78 At least two plastics-making ways are popular: 243 produce various injection moulded articles. Blow-moulded articles, variously made: 65. Extrusion isn't in demand; only 17 entities use this process to make products. The industry has obviously been shifting contours, as more and more uses of plastics have emerged. There is a healthy catering to sectors of the economy now comfortably travelling on the plastics bandwagon. 316 entities are dedicated to electronics and electrical products. Engineering plastics products: 102. Those making household articles: 221. Composites seem a marginal attraction: only 74 entities are making fibreglass products. Industrial plastic products: 268. Medical and surgical equipment: 151. Packaging machinery: 219. If the list of entities the website provides, company by company, is to be believed, the most popular sector catered to is packaging materials: 660 entities are dedicated to making single-use plastics.

Road Ahead

Plastics industry is assured to grow at a good rate with the major applications being in FMCG and consumer goods. There are several factors like low per-capita consumption, manufacturing focus, end use industry growth, availability of feedstock, increasing urbanization, changing lifestyle and demographic dividend, promoting growth of plastic across India.

An application for trademark registration can be made by individual or joint applicants and can be made on the basis of either use or intention to use a trademark in the future. Applications for a trademark registration can be made for in one or more international classes. Once granted, trademark registration is valid for ten years unless cancelled. The mark lapses in ten years unless renewed. The Trademark (Amendment) Act, 2010 has been enacted to amend the Trademark Act, which enables Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other jurisdictions. The amendment also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to align the law with international practice.

Registration of copyrights can be done by submitting a registration form to the Copyright office. While copyright registration is not a pre-requisite for acquiring or enforcing a copyright, registration constitutes prima-facie evidence of the particulars entered therein and may expedite infringement proceedings.

The Designs Act, 2000 (the “Designs Act”)

Even before the expiry of the consent period, the state PCB is authorized to carry out random checks on any industry to verify if the standards prescribed are being complied with by the industry. In the event of non-compliance, the state PCB after serving notice to the concerned industry may close the factory or withdraw water supply to the factory or cause magistrates to pass injunctions to restrain such polluters.

1. Factories Act, 1948
2. Industrial Disputes Act, 1947

TAX RELATED LEGISLATIONS

Income-Tax Act, 1961 (the “IT Act”)

The IT Act is applicable to every company, whether domestic or foreign whose income is taxable under the provisions of this Act or Rules made there under depending upon its “Residential Status” and “Type of Income” involved. The IT Act provides for the taxation of persons resident in India on global income and persons not resident in India on income received, accruing or arising in India or deemed to have been received, accrued or arising in India. Every company assessable to income tax under the IT Act is required to comply with the provisions thereof, including those relating to Tax Deduction at Source, Advance Tax, Minimum Alternative Tax and the like. Every such company is also required to file its returns by September 30 of each assessment year.

The Central Goods and Services Tax Act, 2017 (the “GST Act”)

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realize the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer. Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. This Act has been made applicable with effect from 1st July 2017.

With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Act. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

LAWS RELATING TO SPECIFIC STATE WHERE ESTABLISHMENT IS SITUATED***The Maharashtra Shops and Establishments Act, 1948 ("The Maharashtra Shops Act")***

The Maharashtra Shops Act is applicable to the state of Maharashtra and provides for the regulation of conditions of work in shops, commercial establishments, restaurants, theatres and other establishments. The Maharashtra Shops Act is enforced by the Chief Inspector of Shops (CIS) and various inspectors under the supervision and control of Deputy/Assistant Labour Commissioners of the concerned District, who in turn function under the supervision of Labour Commissioner.

The Maharashtra State Tax on Professions, Trades, Callings and Employments Acts, 1975

The professional tax slabs in India are applicable to those citizens of India who are either involved in any profession or trade. The State Government of each State is empowered with the responsibility of structuring as well as formulating the respective professional tax criteria and is also required to collect funds through professional tax. The profession taxes are charged on the incomes of individuals, profits of business or gains in vocations. The profession tax is charged as per the List II of the Constitution. The profession tax is classified under various tax slabs in India. The tax payable under the State Acts by any person earning a salary or wage shall be deducted by his employer from the salary or wages payable to such person before such salary or wages is paid to him, and such employer shall, irrespective of whether such deduction has been made or not when the salary and wage is paid to such persons, be liable to pay tax on behalf of such person and employer has to obtain the registration from the assessing authority in the prescribed manner.

b. Use of estimates

Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

c. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature reported amounts of assets and liabilities on the date of financial statements and the reported amounts of revenues and expenses during the reported period. Differences between the actual results and estimates are recognized in the period in which the results are known / materialize.

1.3 Cash and cash equivalents (for purposes of cash flow statement)

Cash comprises cash on hand and demand deposit with banks. Cash equivalents are short term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into loan amounts of cash and which are subject to insignificant risk of changes in values.

1.4 Property, Plant & Equipment and intangible assets

- i. Tangible Fixed Assets are stated at cost of acquisition or construction (net of GST) less accumulated depreciation and impairment losses. The cost of assets comprises of its purchase price and any directly attributable cost of bringing the assets to their location and working condition upto the date of its intended use.

- iii. Capital Work-in-progress is stated at cost which includes expenses incurred during construction period, interest on amount borrowed for acquisition / construction of qualifying assets and other expenses incurred in connection with project implementation in so far as such expenses relate to the period prior to the commencement of commercial production.

1.5 Component Accounting

Due to application of Schedule II to the Companies Act, 2013, the company identifies and determines cost of each component/ part of the asset separately, if the component/ part have a cost which is significant to the total cost of the asset and has useful life that is materially different from that of the remaining asset. These components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset.

1.6 Depreciation and Amortization

Depreciation on Tangible Fixed Assets is provided on prorata basis for the period of use, on written down method at the rates determined based on useful lives of respective assets as prescribed in the Schedule II of the Companies Act, 2013.

1.7 Impairment

The carrying amounts of Tangible Fixed Assets are reviewed at each balance sheet date to determine, if there is any indication of impairment based on external/internal factors. An impairment loss is recognized wherever the carrying amount of Tangible Fixed Assets exceeds its recoverable amount which represents greater of the “net selling price” and “value in use” of the respective assets. The impairment loss recognized in prior accounting period is reversed if there has been an improvement in recoverable amount.

1.8 Lease

Lease payments under an operating lease are recognized as expense in the Statement of Profit and Loss as per terms of lease agreement.

1.9 Revenue Recognition

i. Sale of goods:

Revenue is recognized to the extent it is probable that the economic benefits will flow to the company and that the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer. The company collects GST on behalf of the government and, therefore these are not economic benefits flowing to the company. Hence, they are excluded from revenue. Excise duty deducted from revenue (gross) is the amount that is included in the revenue (gross) and not the entire amount of liability arising during the years.

Claims / Refunds not ascertainable with reasonable certainty are accounted for, on final settlement and are recognized as revenue on certainty of receipt on prudent basis.

ii. Rendering of services:

Revenue from sale of services are recognized when the services are rendered.

iii. Other Income

Dividend income on investments is recognized when the right to receive dividend is established. Interest income is recognized on a time proportionate basis taking into account the amounts invested and the rate of

interest. For all financial instruments measured at amortized cost, interest income is recorded using the Effective interest rate method to the net carrying amount of the financial assets.

2. Government Grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

Government grants related to revenue are recognized on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs which they are intended to compensate. Such grants are deducted in reporting the related expense. When the grant relates to an asset, it is recognized as income over the expected useful life of the asset.

2.1 Investments

- i. Investments which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. The portion of long term investments expected to be realized within twelve months after the reporting date are disclosed under current investments.
- ii. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees & duties.
- iii. Long-Term Investments are stated at cost. Provision for diminution is made if the decline in value, in the opinion of the management, is other than temporary in nature.

2.2 Inventories

Inventories of traded goods are valued at cost or net realizable value whichever is lower.

Net Realizable Value is the estimated selling price in the ordinary course less the estimated cost of completion and the estimated costs necessary to make the sale.

2.3 Borrowing Cost

Borrowing cost directly attributable to the acquisition or construction of qualifying assets is capitalized until the time all substantial activities necessary to prepare the qualifying assets for their use are complete. A qualifying asset is the one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are recognized as expenses in the period in which they are incurred.

2.4 Taxes

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961.

Deferred Income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i. e. the period for which MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of MAT under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

2.5 Foreign Currency Transactions and Derivatives

Foreign Currency Transactions and balances:

- i. Initial recognition: Foreign Currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.
- ii. Conversion: Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date.
- iii. Exchange differences: The company accounts for exchange differences arising on translation/ settlement of foreign currency monetary items as below:
 1. Exchange differences arising on long-term foreign currency monetary items related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset.
 2. All other exchange differences are recognized as income or as expenses in the period in which they arise.
- iv. Forward exchange contracts entered into to hedge foreign currency risk of an existing asset/ liability. The premium or discount arising at the inception of forward exchange contract is amortized and recognized as an expense/ income over the life of the contract. Exchange differences on such contracts, are recognized in the statement of profit and loss in the period in which the exchange rates change. Any profit or loss arising on cancellation or renewal of such forward exchange contract is also recognized as income or as expense for the period. None of the foreign exchange contracts are taken for trading or speculation purpose.

2.6 Earnings Per Share:

Basic Earnings Per Share (EPS) is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year. Diluted EPS is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year as adjusted for the effects of all dilutive potential equity shares, except where the result are anti-dilutive.

2.7 Employee Benefits

All employees' benefits due wholly within a year of rendering services are classified as short term benefits. These benefits like salaries, wages, short term compensation absences, expected cost of bonus, ex-gratia are recognized as expenses on accrual basis of undiscounted amounts in the Profit and Loss Account.

2.8 Provision, Contingent Liabilities and Contingent Assets

A provision is recognized when the company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. The expense relating to any provision is presented in the statement of profit and loss, net of any reimbursement.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that

cannot be recognized because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are neither recognized nor disclosed in the financial statements.

Note: Statement in the Management Discussion and Analysis Report describing our objectives, outlook, estimates, expectations or prediction may be "Forward looking statement" within the meaning of applicable securities laws and regulations. Important factors that could make a difference to our operations include, among others, economic conditions affecting demand/supply and price conditions in domestic and overseas market in which we operate, changes in Government Regulations, Tax Laws and other Statutes and incidental factors.

BUSINESS OVERVIEW

Our business was originally being run as a proprietorship named Roni Enterprises. Further, our company is incorporated on 9th October 2017, as a private limited company under the name 'Roni Household Private Limited' under the provisions of the Companies Act, 2013 with the Registrar of Companies, Mumbai with a vision to corporatize our business. A MOU dated April 5, 2018 has been entered into to give effect to the takeover of the business of Roni Enterprise (Proprietor Harish Sirwani). On March 01, 2018, our Company was converted into public limited company and the name of our company changed to 'Roni Household Limited'.

Our Company currently trades in plastic granules and plastic household products which includes tub, buckets, ghamela etc. We intend to further expand our business by manufacturing plastic products for household use. We have taken a land on lease in MIDC Jalgaon for the proposed manufacturing unit. For further details, please refer to the "Property/Land details" of this chapter on page no. 80 of this Draft Prospectus. A part of our proposed manufacturing unit has been set up on the leased land. Trial manufacturing process for small part of our proposed capacity has recently commenced.

Our Company plans to leverage its promoter networks in the Trading community of Jalgaon and strong balance sheet situation to increase its presence in the plastic products. Our Company is in the process of building a quality and innovation focused trading and manufacturing vertical as well as developing a strong team to cater to its proposed increased operational needs.

Since our company was recently incorporated we have not completed a full financial year, however we have reported a robust operating performance for 6 months period ended March 31, 2018 wherein our sales, EBIDTA and Profit after Tax were ₹ 429.70 lakhs, ₹ 10.58 lakhs and 7.80 lakhs respectively.

COMPETITION

Competition is faced by our business from other existing traders and manufacturers of plastic products which are dealt by us. We engage with our competitors on a regional or product line basis which is unorganized. Many of our competitors have substantially large capital base and resources than we do and offer broader range products. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the services and products.

Significant Developments after August 31, 2018 that may affect our Future Results of Operations

We intend to further expand our business by manufacturing plastic products for household use. We have taken a land on lease in MIDC, Jalgaon, for the proposed manufacturing unit. A part of our proposed manufacturing unit has been set up on the leased land and trial manufacturing process has started.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in the draft prospectus and the Risk Factors given in the draft prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Revenue Generation

Currently, we earn our entire revenue from sale of products. However, we intend to further expand our business by manufacturing plastic products for household use. We have taken a land on lease in MIDC, Jalgaon, for the proposed manufacturing unit. For further details, please refer to the “*Property/Land details*” of this chapter on page no. 80 of this Draft Prospectus. A part of our proposed manufacturing unit has been set up on the leased land and trial manufacturing process has started. Our ability to successfully implement its strategy and its growth and expansion plans

Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company’s roll out schedules and cause cost and time over runs.

General economic and business conditions

As a Company with its complete operations in India, we are affected by general economic conditions in the country and in particular economic factors that affect debt syndication industry in India. India’s gross domestic product, or GDP, has been and will continue to be of importance in determining our operating results and future growth.

Apart from mentioning the revised options in the Revision Form, the Applicant must also mention the details of all the bid options given in his or her Bid cum Application Form or earlier Revision Form. For example, if a Applicant has Bid for three options in the Bid cum Application Form and such Applicant is changing only one of the options in the Revision Form, the Applicant must still fill the details of the other two options that are not being revised, in the Revision Form. In case of Applicants specifying more than one Bid Option in the Bid cum Application Form, the total Bid Amount may be calculated for the highest of three options at net price, i.e. Bid price less discount offered, if any.
- b) Applicant may Offer instructions to block the revised amount based on cap of the revised Price Band (adjusted for the Discount (if applicable) in the ASBA Account, to the same Designated Intermediary through whom such Applicant had placed the original Bid to enable the relevant SCSB to block the additional Bid Amount, if any.
- c) In case the total amount (i.e., original Bid Amount less discount (if applicable) plus additional payment) exceeds ₹ 200,000, the Bid may be considered for allocation under the Non-Institutional Category in terms of the Prospectus. If, however, the Applicant does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for may be adjusted downwards for the purpose of Allotment, such that additional amount is required blocked and the Applicant is deemed to have approved such revised Bid at the Cut-off Price.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Applicants may refer to Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Offer for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a. In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity

Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).

- b. In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations, 2009 or Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a. In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows:
(i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;

In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the Investor and the BRLMs, subject to compliance with the following requirements:
 1. not more than 60% of the QIB Category will be allocated to Anchor Investors;

Based on the physical book and at the discretion of the issuer in consultation with the BRLMs, selected Anchor Investors will be sent a CAN and if required, a revised CAN.
- c) **In the event that the Issue Price is higher than the Anchor Investor Issue Price:** Anchor Investors will be sent a revised CAN within one day of the Pricing Date indicating the number of Equity Shares allocated to such Anchor Investor and the pay-in date for payment of the balance amount. Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a. Bidders may be categorized according to the number of Equity Shares applied for;
- b. The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c. The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d. In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e. If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f. If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first

adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be "qualified institutional investors" (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur. The above information is given for the benefit of the Applicants. Our Company, the Selling Shareholders and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.
